

Do your washrooms make the grade?

tenon
washrooms

New toilet cubicles and washroom systems can greatly enhance the appearance of any educational facility as well as being functional. Replacing unappealing old facilities with contemporary new designs can raise moral and develop a sense of pride, thereby reducing vandalism.

And yet good washroom facilities need not cost the earth!

Careful selection of the correct materials, combined with effective layout and design can deliver a long, durable life and create a lasting impression. Maintenance is also easier, ensuring the facilities always look welcoming.

Tenon Washrooms have a wealth of experience in providing solutions for education and offer systems specifically designed for Secondary Schools, Colleges and Universities – Premier Plus & Premier Leisure.

Secondary Schools, Colleges & Universities

Washroom environments for older students can often be subject to higher levels of wear and even abuse. An incorrect choice of materials will usually lead to the need for cubicles being replaced sooner than would normally be required. Tenon Washrooms have designed a range of products specifically to withstand high usage and potential abuse.

Premier Plus

Manufactured from high impact resistant solid grade laminate, these cubicles are designed specifically to withstand excessive wear or abuse. A choice of three pastel door colours complements the neutral grey panels, offering a traditional and stylish appearance. All surfaces are impervious to cleaning chemicals or bacteria and are easy to maintain.

Premier Leisure

Using the same solid grade laminate, Premier Leisure features a robust tubular steel frame for the head rails and support legs for maximum strength. The frame is available in a choice of five vibrant colours as standard, with co-ordinated finger plates for added styling. Premier Leisure can be hosed clean and is therefore ideal for any area, but particularly sports hall washrooms and changing areas.

- › Tough and durable construction
- › Easy to hose clean and maintain
- › Suitable for wet and humid conditions
- › Heavy duty furniture & fixings as standard
- › 5 year guarantee*
