

# Welcoming Washrooms –

It's as easy as

**tenon**  
washrooms

**A visit to the school toilets can be a daunting experience for younger children. Many pupils worry about the lack of privacy, broken seats and even dirty, smelly toilets. The Bog Standard\* campaign suggests that avoiding use of the facilities can affect health and learning.**

**And yet good washroom facilities need not cost the earth!**

New toilet cubicles and washroom systems can greatly enhance the appearance of any educational facility as well as being functional. Careful selection of the correct materials, combined with effective layout and design can deliver a long, durable life and provide a relaxed and welcoming environment.

Tenon Washrooms have a wealth of experience in providing solutions for education and offer systems specifically designed for Nursery and Primary Schools – Tiny Tots and Kaleidoscope – from the Toodle Loos range.

**Toodle-Loos**

## Nursery & Primary Schools

Designed with toddlers and smaller children in mind, the Toodle-Loos range is suitable for locations where soft shapes and stimulating colours are required, available in yellow, red and blue primary colours.

For Nursery Schools, the Tiny Tots range is designed to be fun but private to use. Soft, stylishly curved panels are used to eliminate sharp edges and corners. Reduced height doors and fascias appear less daunting, whilst retaining privacy.

Two new characters have been added to the collection – “Godfrey” and “Miss Molly”. Pre-applied transfers provide added interest with characters that smaller children will easily relate to.

For older children and Primary Schools, the Kaleidoscope range offers a choice of full or reduced height doors and cleverly designed curved partition panels that still retain privacy. Added strength is offered by a tubular headrail system.

Tenon Washrooms also offer a comprehensive range of cubicle designs for adults and older children, with an extensive choice of colours and finishes.

- › Specially designed for smaller children
- › Attractive and stimulating primary colour finishes
